Detailed Action

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William Allen on Monday, August 14, 2006.

The application has been amended as follows:

**CLAIMS**

1. (Amended) An electrically-operated dispenser for dispensing an adhesive, the electrically-operated dispenser comprising:

a module body having an adhesive inlet.

a nozzle coupled with the module body, said nozzle having an adhesive outlet and a valve seat between said adhesive inlet and said adhesive outlet;

an electromagnetic coil including a plurality of windings; and

an armature disposed in said module body, and said armature including a valve element having an opened position allowing adhesive flow through an annular gap between said valve element and said valve seat to from said adhesive

Art Unit: 3754

outlet and a closed position in which said valve element contacts said valve seat for preventing adhesive flow from to said adhesive outlet;

~~an electromagnetic coil including a plurality of windings; and~~

a generally U-shaped pole disposed in said module body, said pole having a fixed position relative to said module body, said pole having a first arm and a second arm extending with a generally parallel and spaced-apart relationship toward said armature, said plurality of windings being wrapped about substantially an entire length of said first arm and said second arm, and said plurality of windings of said electromagnetic coil being selectively energized for generating an electromagnetic field capable of moving said armature relative to said pole to move said valve element from said closed position to said opened position.

Claim 3 has been re-entered:

3. (Previous Presented) The electrically-operated dispenser of claim 2 wherein said first arm and said second arm define a cavity, said return spring being located in said cavity.

The following is an examiner's statement of reasons for allowance:

With respect to claim 1:

The limitations found in claim 1 of an electrically-operated dispenser for dispensing an adhesive having an electromagnetic coil that includes a plurality of windings, wherein the plurality of windings includes a third set of windings, are wrapped about substantially the entire length of the first and second arms of the generally

shaped U-pole in combination with other claimed limitations and novelty structure that were not found or taught by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Comments

The NOA is incorrect. It should read claims allowed 1-13, because claim 3 was re-entered and claim 21 is just a duplicate of claim 3 and is now cancelled. Note that the NOA has been corrected.
